FusionAuth
Auth for Any App.

Compare FusionAuth to OneLogin

OneLogin and FusionAuth are different products from different styles of company. For example, you may have seen OneLogin press releases describing their multi-million dollar investment in blockchain technology integrations. This might be great for them in the long-long-long-term, but FusionAuth takes a different approach. We focus on features and functionality we know our customers need and use. Our goal is to provide developers with a streamlined platform that matches company requirements without adding unnecessary overhead.

FusionAuth also installs on any server, anywhere in the world, for complete user data control. Use the chart below to compare our features and read more in our API documentation.

	OneLogin	FusionAuth
